Spring 2005

Test 1 Distribution of Scores.

The Test 1 average was 69, with the individual section averages ranging from 64 to 75. The high score was 99, there were 12 scores of 90 or higher, and 23 of 85 or higher. I'm pleased, and hope you'll do even better on the next test. Keep up the good work.

Remember that I have office hours so that students will bring me their questions. I know the lecture room is a long way from Skiles, and that Skiles is somewhat of a maze, but do stop by.
