
Contents

Foreword	vii
Preface	xi
The Benedetto Mathematical Family Tree	xv
Publications of John J. Benedetto	xvii

Part I Harmonic Analysis

1 The Gibbs Phenomenon in Higher Dimensions	
<i>George Benke</i>	3
2 Weighted Sobolev Inequalities for Gradients	
<i>Hans P. Heinig</i>	17
3 Semidiscrete Multipliers	
<i>Georg Zimmermann</i>	25

Part II Frame Theory

4 A Physical Interpretation of Tight Frames	
<i>Peter G. Casazza, Matthew Fickus, Jelena Kovačević, Manuel T. Leon, Janet C. Tremain</i>	51

Part III Time-Frequency Analysis

5 Recent Developments in the Balian–Low Theorem	
<i>Wojciech Czaja, Alexander M. Powell</i>	79

6 Some Problems Related to the Distributional Zak Transform	
<i>Jean-Pierre Gabardo</i>	101
7 Gabor Duality Characterizations	
<i>Eric Hayashi, Shidong Li, Tracy Sorrells</i>	127
8 A Pedestrian’s Approach to Pseudodifferential Operators	
<i>Karlheinz Gröchenig</i>	139
9 Linear Independence of Finite Gabor Systems	
<i>Christopher Heil</i>	171
<hr/>	
Part IV Wavelet Theory	
<hr/>	
10 Explicit Cross-Sections of Singly Generated Group Actions	
<i>David Larson, Eckart Schulz, Darrin Speegle, Keith F. Taylor</i>	209
11 The Theory of Wavelets with Composite Dilations	
<i>Kanghui Guo, Demetrio Labate, Wang-Q Lim, Guido Weiss, Edward Wilson</i>	231
<hr/>	
Part V Sampling Theory and Shift-Invariant Spaces	
<hr/>	
12 Periodic Nonuniform Sampling in Shift-Invariant Spaces	
<i>Jeffrey A. Hogan, Joseph D. Lakey</i>	253
13 Sampling on Unions of Shifted Lattices in One Dimension	
<i>Bjarte Rom, David Walnut</i>	289
14 Learning the Right Model from the Data	
<i>Akram Aldroubi, Carlos Cabrelli, Ursula Molter</i>	325
15 Redundancy in the Frequency Domain	
<i>Lawrence Baggett</i>	335
16 Density Results for Frames of Exponentials	
<i>Peter G. Casazza, Ole Christensen, Shidong Li, Alexander Lindner</i>	359
Index	371
