Office Hours: MW 9am – 10am or by appointment

Text: Introduction to Graph Theory (2nd edition) by Douglas B. West

- The class meets from 10:05am to 10:55am on MWF in Skiles 169. Prompt and regular attendance is expected. Students will be responsible for all handouts and information given, and work assigned on days they miss classes. In this course, we will cover Chapters 1 through 8 (except for some optional sections).
- Homework contributes 30% to the final grade. Assignments will be collected weekly, but not all problems will be graded. (It would be helpful if you have time to work out all the exercises marked with “–” and “!”.)
- There will be two in-class closed-book tests, each contributes 20% to the final grade. The final exam contributes 30% to the grade. Tests and exams cover different parts of the book, but the materials may overlap.
- Honor Code applies to all homework assignments, tests, and exams. No late homework will be accepted. Absences from tests and exams will be excused **only** when authorized *in advance* by the instructor (in that case, a make-up test will be given).
- Exceptions to and changes in the above policies may be made at the discretion of the instructor.
