Welcome to Integral Calculus! This course is designed to introduce you to the fundamental concepts of integration and infinite series. All of our students play an important role in our educational mission. We hope that you will find this to be a useful, fundamental course for your future studies.

Course Description and Learning Outcomes

Course Title: Integral Calculus

Learning Objectives:
- Students will master basic Calculus concepts, including integration techniques, convergence of integrals and infinite series, and Taylor’s theorem.
- Knowledge of the above concepts will be exhibited algebraically and geometrically.
- Calculus concepts will be applied to solve physics, geometry, and numerical approximation problems.
- Students will understand the usage of proper mathematical notation in relation to the above topics.

Textbook: Thomas, *Calculus: Early Transcendentals*, 13th ed. We will discuss topics in chapters 5-10.

MyMathLab Course Information: We will be utilizing MyMathLab (MML) for homework through a joint code for the Thomas *Calculus* text and the Lay *Linear Algebra* text. In order to register, you will need the course id listed on your instructor’s page. You can access MyMathLab at [www.mymathlab.com](http://www.mymathlab.com).

Important notes on MML:
- If you already have an account on MyMathLab using this combined textbook within the past 18 months, then you do not need to purchase a new code. Login to your account on MyMathLab, select the option to add a new course, and enter our course ID.
- If you already have a MyMathLab account that used either the Thomas or the Lay textbook in the past 18 months, but you were unable to add our course using the previous step, please send an email to Lyndsee.Hewston@Pearson.com and include the following information:
  1. Your First and Last Name
  2. The email address used to register for MML
  3. Your Login ID for MML
  4. Our course ID (listed above)

  You should receive a reply within 36 business hours from the Pearson support team regarding your account status. In the meantime, you can access our course using the “temporary access” option when registering. Please do not pay for a new code until you receive a reply from Pearson.
- If you do not have a MyMathLab account using the Thomas or Lay textbooks, or if your account is over 18 months old, you will need to purchase a new code for our course. Please refer to the registration document, located in the “Resources” section on t-square, to create your new account.
When signing up for MyMathLab, it will be immensely helpful to me (for grading purposes) if you will set your STUDENT ID to your USERID for the GT system (i.e., your T-square USERID, as in “gburdell3”, etc).

MyMathLab comes with an entire electronic version of the textbook; it is your choice if you would also like to own the textbook in print. You may purchase a MyMathLab code either from the bookstore or on-line while registering at http://www.mymathlab.com. If you prefer to own a hardcopy of the text, the bookstore offers packages of MyMathLab combined with a loose-leaf or hardcover version of the Thomas textbook that is less expensive than purchasing the text and code separately.

PLEASE NOTE: GEORGIA TECH HAS A SPECIAL CODE PACKAGE THAT INCLUDES BOTH TEXTBOOKS. THIS CODE CAN ONLY BE PURCHASED THROUGH THE CAMPUS BOOKSTORES OR DIRECTLY FROM PEARSON. CODES PURCHASED BY OTHER VENDORS WILL NOT WORK! Possible ISBNs for this text are: 1323131760, 1323132112, 132313204X, 1323132104, or 1323132120.

Course Organization

This course will consist of lectures and recitations. You are required to attend all scheduled sessions at all times. The Center for Academic Success will also provide our class with a PLUS ("Peer Led Undergraduate Study") leader. PLUS sessions will also meet twice per week. These sessions are optional, but strongly encouraged.

Course Requirements and Grading

HOMEWORK: Homework will be assigned on-line and will consist of exercise problems on MyMathLab. You are expected to understand all homework problems for the tests and quizzes. In order to increase the effectiveness of recitation, you should attempt the problems before the weekly recitation sections. Exercises on MyMathLab will be due every Tuesday at 11:59 PM (except during class recesses or as announced in class). Each assignment contains problems that count toward the grade, and extra practice problems to help you prepare for the quizzes and tests. The lowest homework grade will be dropped. Late homework will be accepted with a 20% deduction per day. Please note: the final graded homework assignment will be due on Tuesday, April 17. The homework average will count as one quiz grade at the end of the term.

PARTICIPATION: Class participation will be based on your attendance in the lectures and recitation sessions. Please see your instructor’s page for details on how this grade will be calculated. Participation will count as one quiz grade at the end of the term.

RECITATIONS: Recitations will be run in a partially “flipped” classroom environment. That means: the TAs will expect that you have attended lecture and reviewed the textbook before class, and they will not lecture on the course material. Instead, you will spend the recitation time working on practice problems. Your TA will measure participation through attendance and effort during the recitation sessions.

QUIZZES: Four quizzes will be given in recitation on Wednesdays. Quizzes will be given during the first 25 minutes of recitation. The lowest quiz grade will be dropped at the end of the term. Quiz dates are as follows:

• Quiz 1: January 17
• Quiz 2: February 14
• Quiz 3: March 14
• Quiz 4: April 18
MIDTERM EXAMS: We will have three midterm exams during the term. Tests will be administered during the full 50 minutes of the recitation period on Wednesdays. The testing dates are as follows:

- Midterm 1: January 31
- Midterm 2: February 28
- Midterm 3: April 4

No books, notes, calculators, cell phones, or other electronic devices are allowed during the tests and quizzes. Showing work is required on all written assessments. As writing mathematics properly is part of learning Calculus, points may be deducted for incorrect mathematical notation.

FINAL EXAM: The final exam will cover all course materials and will be standardized by the department. All students must take the final examination. The common final exam will be administered on Thursday, April 26, from 6:00-8:50 pm.

Your final average will be computed as follows:

Homework and Participation will each count as one quiz grade, giving a total of six quiz grades. The lowest one of these grades will be dropped. We will denote the average of the top five scores as the “Quiz Average” in the table below.

<table>
<thead>
<tr>
<th>Assessment</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quiz Average</td>
<td>30%</td>
</tr>
<tr>
<td>Best Two Midterms (15% each)</td>
<td>30%</td>
</tr>
<tr>
<td>Lowest Midterm</td>
<td>10%</td>
</tr>
<tr>
<td>Common Final Exam</td>
<td>30%</td>
</tr>
</tbody>
</table>

Letter grades will be determined based on the following intervals. You are guaranteed a minimum of the following scale, but do not expect any deviation:

- A: 90% and higher,
- B: [80%, 90%),
- C: [70%, 80%),
- D: [60%, 70%),
- F: [0%, 60%).

Adjustments, if any, to the above scale will be standardized by the department, not the individual instructors.

Midterm grades will be assigned on February 19. A satisfactory grade will be assigned to all students with a midterm average of 70% or higher (based on the above weighting of grades).

Extra credit: As this course is a coordinated class, your instructor will be unable to offer you extra credit opportunities during the term. However, please note that your homework and participation scores together constitute more than 10% of the grade, so coming to every class and completing all of your homework can significantly increase your overall class average.

Class Policies

Attendance: You are expected to come prepared and actively participate in every lecture and recitation session. In the event of an absence, you are responsible for all missed materials, assignments, and any additional announcements or schedule changes given in class. Class disruptions of ANY kind will NOT be tolerated and may result in your removal from the classroom.
and/or loss of participation points for that day.
Please show courtesy to your fellow classmates and instructor by adhering to the following class rules:

- Turn off all laptops, cellular phones, i-pods and other electronic devices, unless you have a documented need to use such devices for note-taking, during class.
- Come to class on time and stay for the entire class period.
- Refrain from conversing with your fellow students.
- Put away any reading materials unrelated to the course.

**Academic Dishonesty:** All students are expected to comply with the Georgia Tech Honor Code (the honor code can be found at http://osi.gatech.edu/content/honor-code). Any evidence of cheating or other violations of the Georgia Tech Honor Code will be submitted directly to the Dean of Students. Cheating includes, but is not limited to:

- Using an unapproved calculator, books, or any form of notes on tests.
- Copying directly from any source, including friends, classmates, tutors, internet sources (including Wolfram Alpha), or a solutions manual.
- Allowing another person to copy your work.
- Taking a test or quiz in someone else's name, or having someone else take a test or quiz in your name.
- Asking for a regrade of a paper that has been altered from its original form.
- Using someone else’s account to gain attendance or homework points for them, or asking someone else to use your account for any graded homework or attendance submission.

**Regrading of Papers:** If a problem on your test has been graded in error, you must submit a regrade request to your instructor (not your TA!) in writing, along with your paper, no more than one week after the tests have been returned in class. Should you wish to have your paper regraded, do not change or add to the work on your paper! If you must write on your returned paper, be sure to write in a different color ink and clearly indicate what you have added. A regrade request can only be submitted if you have done something CORRECT on your test that has been marked as incorrect.

**Make-Ups:** In an emergency situation, a make-up test or quiz may be allowed if your instructor is notified prior to the exam and provided with a reasonable, written confirmation of your absence. Any make-ups must be completed before the corresponding test has been graded and returned to other students. If you will miss a test due to a university-sponsored event or athletics, please provide your instructor with the official documentation in advance.

**Students with Disabilities and/or in need of Special Accommodations:** Georgia Tech complies with the regulations of the Americans with Disabilities Act of 1990 and offers accommodations to students with disabilities. If you are in need of classroom or testing accommodations, please make an appointment with the Office of Disability Services to discuss the appropriate procedures. More information is available on their website, http://disabilityservices.gatech.edu/. Please also make an appointment with your instructor to discuss your accommodation, if necessary.

**Calculators:** While you may need a calculator for help with some of the homework problems, the use of calculators is NOT ALLOWED on in-class assessments.

**Announcements:** You are responsible for obtaining any announcements or materials placed on your instructor’s web pages. Please see your instructor page for a list of important websites.

**Additional Help:** Asking questions is a key to success! Please stop by your instructor’s or TA’s office hours whenever you have questions. Free help is also available Monday-Thursday afternoons in the Math Lab,
located on the second floor of Clough Commons.

*Please note: items on the syllabus and course schedule are subject to change. Any changes to the syllabus and/or course schedule will be relayed to the students in class and through e-mail.*

**Important Dates Throughout the Term**

8 January – First Day of Classes  
15 January – MLK Holiday (No Class)  
31 January – Midterm #1  
19 February – Progress Reports Due  
28 February – Midterm #2  
14 March – Last day to withdraw with a grade of "W"  
19-23 March – Spring Break (No Class)  
4 April – Midterm #3  
23-24 April – Final Instructional Days  
26 April – Common Final Examination (all 1552 classes)
Instructor Page for Math 1552 G1-G4

Instructor: Zaher Hani
Office: Skiles 224.
Office Hours: Tuesday 4:00-4:50pm and Wednesdays, 11:00-11:50 am, and by appointment
E-mail: hani@math.gatech.edu

Course Websites

Instructor's Web Page: http://people.math.gatech.edu/~zhani6
Course Information: http://t-square.gatech.edu/portal (required)
Textbook/Homework Access: http://www.mymathlab.com (required)
Learning Catalytics: https://learningcatalytics.com (required)
On-line Discussions: www.piazza.com (highly recommended)

Course Meeting Times: Lecture meets Tuesdays and Thursdays from 12:00-1:15 pm in Howey (Physics) L3. Recitations meet on Mondays and Wednesdays from 10:10-11:00 am (see locations below).

Please note: Dr. Hani will be out of office on the second week of classes Jan. 15-18 and then from Jan. 29-31 due to research-related travel commitments. Arrangements will be made to cover the class lecture and you will still be responsible for the material covered during class. He does not anticipate any other travel plans that could affect lectures this semester.

MyMathLab Course ID: hani95713

Class participation grade: Attendance will be taken during the semester, both in lecture and recitation. In lecture, attendance will be determined either through a sign in sheet, or via Learning Catalytics (learningcatalytics.com) which is free with your subscription to MyMathLab (For this, you will need to bring an internet capable device (smart phone, tablet, laptop, etc) to class in order to access the questions). Recitation attendance will be determined by your participation in solving the daily worksheet problems.
# MATH 1552 COURSE SYLLABUS

## SPRING 2018

### Tentative Course Schedule

*Please use this as an approximate class schedule; section coverage may change depending on the flow of the course. Review days/topics may be changed or cancelled in the event of inclement weather.*

<table>
<thead>
<tr>
<th>Week and Dates</th>
<th>Section Coverage</th>
<th>Topics</th>
</tr>
</thead>
<tbody>
<tr>
<td>Week 1 January 8-12</td>
<td>Section 4.8, Sections 5.1, 5.2</td>
<td>Review of Derivatives/Anti-derivatives, Area under the curve, Sigma Notation</td>
</tr>
</tbody>
</table>
| Week 2 January 15-19 | Section 5.3, Section 5.4 | **January 15**  
  No class: MLK Holiday  
  The Definite Integral  
  The Fundamental Theorem of Calculus  
  Quiz #1 |
| Week 3 January 22-26 | Sections 5.5-5.6 | Integration by Substitution, Area Between Curves |
| Week 4 January 29-February 2 | Sections 7.1-7.2, Section 8.2 | Logs, Exponentials and Separable DEQs  
  Integration by Parts  
  Midterm #1 |
| Week 5 February 5-9 | Sections 8.3-8.4 | Integration of Products and Powers of Trig Functions  
  Trigonometric Substitution |
| Week 6 February 12-16 | Section 8.5, Section 8.7 | Partial Fractions, Integrating Rational Functions  
  Numerical Integration  
  Quiz #2 |
| Week 7 February 19-23 | Section 4.5, Section 8.8 | L’Hopital’s Rule  
  Improper Integrals |
| Week 8 February 26-March 2 | Section 10.1-10.2 | Sequences, Infinite Series  
  Midterm #2 |
| Week 9 March 5-9 | Sections 10.3-10.4 | The Integral Test, Comparison Tests |
| Week 10 March 12-16 | Sections 10.5 | Ratio and Root Tests  
  Convergence Tests Review  
  Quiz #3 |
| Week 11 March 19-23 | **Spring Break** | No Class |
| Week 12 March 26-30 | Sections 10.6-10.7 | Alternating Series, Power Series |
| Week 13 April 2-6 | Sections 10.8-10.9 | Taylor and MacLaurin Series  
  Midterm #3 |
| Week 14 April 9-13 | Section 10.9 | Taylor Series |
| Week 15 April 16-20 | Sections 6.1, 6.2 | Volumes by Disks and Shells  
  Quiz #4 |
| Week 16 April 23-24 | | Review for Final Exam  
  **FINAL EXAM IS APRIL 26 AT 6:00 PM** |
