1. **General Information.** This information sheet, as well as homework and assignments, are available on the web at www.math.gatech.edu/~andrew.

This course meets for lectures on Mondays, Wednesdays, and Fridays from 10:05-10:55, and in recitation sections on Tuesdays and Thursdays from 10:05 to 10:55. You must attend your assigned recitation section.

My office is 128 Skiles Building, my office phone is 404-894-2719, and my e-mail address is andrew@math.gatech.edu. Office hours are Monday, Wednesday, Friday 2:30 - 3:30, or by appointment. If my office hours are not convenient, please feel free to schedule another time by email.

2. **Text and Material.** The text for this course is Salas, Hille, and Etgen, *Calculus - one and several variables, tenth edition*. We will cover parts of Chapters 1 through 8, parts of Chapter 11, and supplementary material on the exponential and logarithmic functions, and complex numbers. In broad outline, we will cover the theory and applications of differential and integral calculus of functions of one variable. A day by day course outline is posted on my course web page.

3. **Homework, Quizzes, and Tests.** Homework will be assigned, and will be discussed in the recitation sections. You should do all of the assigned problems before recitation, and work additional problems from the texts as well.

At almost every recitation section you will either take a short quiz or turn in one homework problem. The problems to be collected will be indicated on the assignment sheets posted on my web pages. Late homework problems will not be accepted, but your lowest homework score will be dropped. Quiz dates are also indicated on the assignment sheet. There will be no make-up quizzes, but your lowest quiz score will be dropped.

There will be three tests. Each will be 50 minutes long, and they will be held on

- Test 1: September 22, 2011
- Test 2: October 27, 2011
- Test 3: December 1, 2011

I discourage make-ups, but I do have a fair way of assigning grades to students with an excused absence from an hour test. Any student with a valid reason for missing an exam must obtain permission, from Professor Andrew, not from a Teaching Assistant, well before the examination date. Please let Professor Andrew know of any conflicts as soon as possible. Our final exam is scheduled for Friday December 16 from 11:30 to 2:20. Check your final exam schedule now, and let me know if you have a conflict. The only conflict relevant to this course is three exams on Friday December 16, in which case your Math 1501 exam will be rescheduled to the conflict period -- Saturday December 17.
5. Honor Code. Please review the Georgia Tech's Academic Honor Code (http://www.deanofstudents.gatech.edu/osi/). All examinations and quizzes in this course are closed book. No notes may be used, but calculators are permitted. You must work independently on the homework problems that are collected for grading. I have posted many old Math 1502 tests on my web pages.

6. Grading. The homework, quizzes, tests, and final examination will be counted with the following weights.

<table>
<thead>
<tr>
<th>Grade Description</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recitation score (from TA)</td>
<td>2%</td>
</tr>
<tr>
<td>Homework</td>
<td>7%</td>
</tr>
<tr>
<td>Quizzes</td>
<td>7%</td>
</tr>
<tr>
<td>Hour Tests</td>
<td>50%</td>
</tr>
<tr>
<td>Final Examination</td>
<td>34%</td>
</tr>
</tbody>
</table>

Letter grades will be based on the overall average at the end of the semester, according to the scheme

\[
\begin{align*}
90 \leq x & \quad \text{A} \\
80 \leq x & \quad \text{at least B} \\
70 \leq x & \quad \text{at least C} \\
60 \leq x & \quad \text{at least D} \\
x < 50 & \quad \text{F}
\end{align*}
\]

That is, I may "curve up" from the 90, 80, 70, 60 cutoffs, but scores below 50 will not be curved up to pass.

Students with questions regarding the grading of a test must return the test to Prof. Andrew (not to a Teaching Assistant), with a note on a separate piece of paper explaining the complaint, within one week of the date the test was returned to the class.

7. Progress Report Grades. This semester progress report grades (S or U) will be reported in Freshman and Sophomore courses on September 30. This grade will be based on a weighted average of all course work due on or before September 23, with the S/U cutoff set at 60%. While this "grade" will give you an indication of your performance, please keep in mind that it is based on only a small fraction of the course. I encourage you to consult with me frequently during the semester.
