1. Misprints

I apologize for these!

(1-3) is correct in the online edition, but not in the print edition. This is what it should be: Given $1 \leq m \leq n$, we define the $m$–point correlation function

$$R^m_m (\mu; x_1, x_2, ..., x_m)$$

$$= \frac{n!}{(n - m)!} \int \cdots \int \left( \prod_{1 \leq j < k \leq n} (x_k - x_j)^2 \right) d\mu (x_{m+1}) ... d\mu (x_n) \frac{\prod_{1 \leq j < k \leq n} (t_k - t_j)^2 \int \cdots \int d\mu (t_1) ... d\mu (t_n)}{\prod_{1 \leq j < k \leq n} (t_k - t_j)^2 \int \cdots \int d\mu (t_1) ... d\mu (t_n)}.$$ 

In (1-12), (1-16) and (1-17), in both the printed and online edition, the lower and upper indices of summation are wrong. Thus $1 \leq j_1 < j_2 < \ldots \leq j_m \leq n$ should be replaced by $0 \leq j_1 < j_2 < \ldots < j_m < n$. For example, (1-12) should be:

$$K^n_m (\mu, \varphi, t) = \frac{1}{m!} \sum_{0 \leq j_1 < j_2 < \ldots < j_m < n} T_{j_1, j_2, ..., j_m} (\varphi) T_{j_1, j_2, ..., j_m} (t).$$
