

MATH3012B, Fall 2005
Applied Combinatorics
Course Policies and Procedures

Instructor: Xingxing Yu

Office: Skiles 235A

Office Phone: 4-4757

Email: yu@math.gatech.edu

Office Hours: T, Th 8:30am–9:30am or by appointment

Text: Discrete and Combinatorial Mathematics (Fifth edition), by R. P. Grimaldi.

- The class meets from 9:35am to 10:55am on Tuesdays and Thursdays in Skiles 169. Prompt and regular attendance is expected. Students will be responsible for all handouts and information given, and work assigned on days they miss classes.
- Homework will be assigned and collected, but a subset of problems will be graded. Homework contributes 10 points to the total of 100 points. Test and final problems will be similar to problems assigned and examples given in class.
- There will be three in-class and closed book tests. Each test contributes 30 points to the total of 100. Test 1 covers first three topics, Test 2 covers Topics 4, 5 and 6, and Test 3 covers topics 7 and 8. Exact test dates will be announced one week in advance.
- The final exam will cover everything we study in this course, and contributes 30 points to the total of 100. You have the option not to take the final or to use the final to replace one of the three tests.
- Honor Code applies to all tests and the final. Dispute on any test grade must be brought up on the day when the graded test is returned. Calculators are not allowed for tests and final exam. However, you may use a formula sheet for tests and final. Absences from tests or final will be excused **only** when authorized **in advance** by the instructor (in that case, a make-up test will be given).
- Exceptions to and changes in the above policies may be made at the discretion of the instructor.
